## Summary

A detail-oriented Digital Product Designer with 10+ years of experience in producing efficient form & function solutions. Armed with a comprehensive understanding of HTML and CSS, capable of designing applicable user interfaces that push the limits of designated medium. Possesses a track record of designing a platform of interoperable interfaces that include a mobile app, an administrative interface and a website building tool; with an easy to use drag and drop mechanism, aimed at users with no technical background.

## Technical Skills

- **Design & Wireframing Tools**  
Sketch, Figma, XD, Photoshop, Illustrator, After Effects
- **Web Technologies & Frameworks**  
HTML, CSS, Sass, Javascript, JQuery, Vue.js, Grunt

## Work Experience

- **MeetingHand**  
Digital Product Designer  
feb 2016 - present
  - Redesigned the brand identity to better reflect the company vision and objectives, conceptualized and developed a consistent visual design system, including a customized icon set.
  - Conceptualized and designed dashboard interfaces for three different user types with different goals. Established a front-end architecture with reusable components, running on Vue.js framework.
  - Designed and developed a custom mobile app building tool, a custom website building tool and an event agenda building tool, with an easy to use drag and drop mechanism, aimed at users with no technical background.
- **Nokta Domains**  
Project Leader  
apr 2013 - jul 2015
  - Led a team of 5 spectacular teammates in the design and development process of the e-commerce service which enables the customers to purchase or lease the domain names.
  - Designed and developed a domain name valuation tool that scores the given domain name across various quality parameters and casts a report as output.
  - Designed and developed various landing pages for most valuable domain names which even includes a "find the pair" game built with phaser.js.
- **Positive - A Digital Approach**  
Sr. Front-end Developer  
feb 2011 - apr 2013
  - Introduced and integrated the mobile first approach and responsive design concept to product design process of the company.
  - Developed and integrated a boilerplate front-end development system to initiate upcoming projects faster.
- **Sanpark**  
User Interface Designer  
Front-end Developer  
feb 2007 - feb 2011
  - Designed and developed more than 100 websites of various densities.
  - Participated in the design and development of a content management system interface for the customers.
  - Introduced and integrated "front-end development based on web standards" into company culture.

## Education

- **Eastern Mediterranean University**  
Department of Computer Studies and Information Technologies  
jun 2000 - feb 2007
